Karjat, India

PROFESSIONAL SUMMARY

Innovative and detail-oriented Computer Engineering student with hands on experience in web development, UI/UX design, and game development. Proficient in React, PHP, and Java, with a strong ability to design engaging user-friendly interfaces using Tailwind CSS and Framer Motion. Adept at implementing advanced features like seamless navigation, multi-language support, and custom animations to enhance user experience. Demonstrated problem-solving skills through projects like an e-commerce platform, an AI-powered creativity suite, and a Traffic Rider game. Passionate about developing revolutionary apps and tools that bridge technology and user creativity.

Looking to bring technical expertise, creativity, and a collaborative spirit to innovative development projects.

SKILLS

- Programming & Development
- Backend: PHP, Flask, Razorpay Integration
- UI/UX Design
- Immersive navigation and transition effects
- Tools & Frameworks
- Instaloader (Python-based Instagram integration)
- Razorpay Payment Gateway
- Building revolutionary app concepts (e.g., road condition monitoring app)
- Collaboration & Project Management
- Presentation and documentation for academic and personal projects
- Teamwork and collaboration
- Creativity and innovation

- Frontend: React, HTML, CSS, Tailwind CSS, Framer Motion
- Game Development: Java (Traffic Rider-style game mechanics)
- User-centered design principles
- Advanced UI components (dialog boxes, floating taskbars)
- IntelliJ IDEA
- Google Translate API
- Creative Problem Solving
- AI-powered tools for creative professionals
- Collaborative development of mini-projects (e.g., graphical password authentication system)

Soft Skills

- Adaptability and quick learning

EXPERIENCE

Student

- Web Developer & Designer
  (Jan 2023 – Present)

  Developed a dynamic e-commerce website using PHP, Tailwind CSS, and Razorpay integration, focusing on intuitive design and login-free purchasing.
  Designed innovative UI/UX elements including immersive navigation bars, dialog boxes, and smooth transitions to enhance user engagement.
  Implemented Instagram media downloader functionality using Flask and Instaloader, solving compatibility challenges with third-party libraries.
  Added multi-language support through Google Translation API to improve accessibility and reach.
  Integrated a rating and review system to collect customer feedback and improve service quality.

- React Portfolio Developer
  (Oct 2024 – Present)

  Created an advanced React portfolio with Framer Motion animations and Tailwind CSS, delivering a professional and modern presentation of skills.
  Designed and implemented a floating taskbar with a pointer indicator for active sections, enhancing user navigation.

- Creative Game Developer (Java)
  (Jan 2024 – Apr 2024)

  Developed a Traffic Rider game in Java, focusing on gameplay mechanics like lane-switching, collision avoidance, and responsive design.
  Implemented efficient algorithms for vehicle spawning and sizing to optimize game performance and user experience.

EDUCATION

Bachelor Of Engineering: Second Year
Pillai HOC College Og Engineering and Technology, Rasayani , India
